Dear Sir or Madam,

my name is Maurice \*Name\*. I am finishing my masters degree (Msc) in computer science with focus on virtual reality, physics animation and computer graphics right now.

I live in Germany and study computer science in a very renowned university (\*University\* - University of applied Sciences). After visiting \*City\* for several weeks a few years back, I decided, that this is the place I want to go. This, combined with \*Company\* having its headquarters in \*City\*, finalized my decision of moving to your beautiful city.

With several highly relevant projects in the field of computer graphics, as well as experience with various programming languages and the OpenGL pipeline, I think, I will be a good fit for a position in your computer graphics and development department.

My masters degree will be finished in november 2016. After that, I will be visiting \*Country\* for a few months before finally moving to \*City\*. During that time I will be available for personal interviews and meetings. Apart from that, I can arrange telephone/Skype interviews at any time. Please see a more detailed description of my projects and life in the attachments.

I would very much appreciate hearing from you.

Yours sincerely,

Maurice \*Name\*
